EMV COMPLIANT CARD PAYMENT SOLUTIONS

This pack contains dual-interface cards for contact and contactless terminal integration testing. So you can evaluate your acceptance of contact and contactless EMV cards via all the processing paths. Dual-interface means that you can also use the same cards to test your regular chip terminal. UCP Inc. provide a pack of 2 cards containing Visa Debit/ Discover Credit & US Debit and Contactless MasterCard DDA/CDA. The test cards should only be used in a Test/ Training environment for basic transaction/ confidence testing and transaction purposes.

Benefits

What Our EMV Test Cards can do for you;

- Rapidly test your system for full end-to-end transaction performance and interoperability
- Ensure system robustness by covering a wide range of exceptional transactions and card types
- Enables typical chip card transactions through terminals to assist with system integration and hardware testing.
- Provide the right card profiles to your development team for any EMV contact or contactless requirement
- Deploy EMV payments with confidence
